## PRODUCT OVERVIEW

Coredeluxe IWF Competition Kettlebells are classic cast iron kettlebells in a modern version. Unlike most classic kettlebells made of raw iron, Coredeluxe IWF Competition Kettlebells are made of fine cast iron with a matte powder coating for a very fine structure. Due to the high density of the fine cast iron, these kettlebells are also stronger than usual. The handle is extra finely ground so that no seams are noticeable and the kettlebell fits perfectly in the hand. Each kettlebell is equipped with coloured straps for quick weight recognition.

Meanwhile, Coredeluxe also offer newest PU Kettlebell in the market. Most of customer complaint cast iron kettlebell easily rusted after short time use. Coredeluxe give a innovate in kettlebell. Great grip, freindly nature PU Coating, and shine chrome grip. Custom logo available and free tooling charge.

We color coded the handles and logos. By associating each kettlebell weight increment with a different color handle, it becomes much easier for gym owners and trainers to direct athletes to specific kettlebells on sight alone.
